

Transport Matters

Integrated Approaches to Planning City-Regions

Angela Hull

Addressing the principles of sustainability, spatial planning, integration, governance and accessibility of transport, this book focuses on the problem of providing efficient and low energy transport systems which serve the needs of everybody.

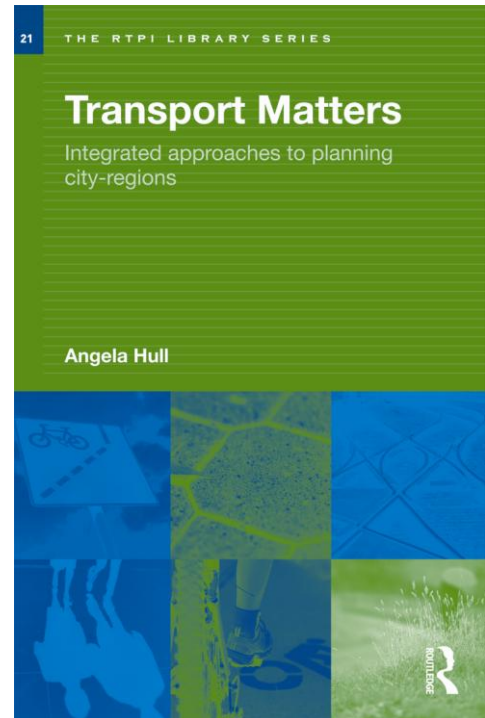

It explores many of the new arguments, ideas and perceptions of mobility and accessibility in city-regions. Looking at evidence from Denmark, Sweden, The Netherlands, the US and the UK, it considers the meaning of the key concepts of sustainable accessibility, the spatial planning model, and integrated territorial policies.

Selected Contents: Preface 1. Time for Change? The Rationale for Low Energy Transport Provision 2. Understanding Current Patterns of Transport Behaviour in Europe 3. Sustainable Accessibility: New Wine in Old Bottles? 4. Institutional Structures for Low Energy Futures: Creating Integrated Approaches 5. Understanding the Institutional Barriers to Change 6. Intervention Instruments for Sustainable Transport Futures 7. Integrated Territorial Planning in Practice: Case Studies 8. Implementing a Sustainable Transport Package
