

European Spatial Planning and Territorial Cooperation

Stefanie Dühr, Claire Colomb & Vincent Nadin

The EU has become an important framework for planning practice, research and teaching. Spatial planning in Europe is being 'Europeanised', with corresponding changes for the role of planners.

Written for students, academics, practitioners and researchers of spatial planning and related disciplines, this book is essential reading for everybody interested in engaging with the European dimension of spatial planning and territorial governance. It explores:

- spatial development trends and their influence on planning
- the nature, institutions and actors of the European Union from a planning perspective
- the history of spatial planning at the transnational scale
- the planning tools, perspectives, visions and programmes supporting European cooperation on spatial planning
- the territorial impacts of the Community's sector policies
- the outcomes of European spatial planning in practice

Selected Contents: Preface, Acknowledgements, List of Acronyms and Abbreviations **Part 1: Introducing The European Dimension of Spatial Planning** 1. Introducing the European Union as a Planning Subject 2. Arguing for and against European Spatial Planning 3.
