

The Karlsruhe Institute for Technology (KIT) is a merger of the Universität Karlsruhe (or "Fridericiana") and the National Research Center Karlsruhe. This ground-breaking step led to the foundation of an institution with 8,000 employees, 18,500 students and almost 300 academics, funded with an annual budget of 700 million Euros.

The Institute for Urban and Regional Planning of the Department for Civil Engineering is seeking to fill the following position:

Research Associate

(50%, for 3 years with the possibility of extension, contract according to the national standard of TVL13)

in the field of Spatial Planning / Urban Planning.

Applicants should have an excellent university-level Masters degree in Urban and Regional Development, Human Geography or another related discipline. Candidates should have research experience/interest in the fields urban and regional development and international projects. The person employed will be expected to develop a personal research agenda as part of a dissertation, and to work on new applications for external funding. The position will also involve teaching in line with the department's teaching portfolio of "Spatial and Infrastructure Planning" of the department for Civil Engineering.

Handicapped individuals with the same level of qualification will be given preference (please add proof). The KIT seeks to increase the share of female researchers and therefore welcomes applications of qualified women.

Candidates should send a letter of application and full curriculum vitae including all relevant certificates until the 3rd of December 2010 to
